?

Cancel OK

3. Choose **Region Code 1** for the US. Click on the **Set Drive Region** button. You can only change this 5 more times before the region is permanently set to use only that last chosen region.

Drive Region

Since this is the first use of a DVD disc, the drive region must be set before playing.

A world map with regions numbered 1 through 6. Region 1 is green (North America), Region 2 is orange (Europe, Africa, Middle East), Region 3 is blue (Southeast Asia), Region 4 is yellow (South America, Australia), Region 5 is light blue (Russia), and Region 6 is red (East Asia).

Select New Region For Drive:

You can only set the drive region a total of 5 times.

Click the lock to prevent further changes. Cancel Set Drive Region ?

4. A new dialogue box will appear saying "The drive region code was successfully changed". Click the ok button.

The drive region code was successfully changed.

OK
